

digitalSTROM Installation recommendations

System size

1. 150 digitalSTROM terminals (with 2 dSIDs per terminal)
2. 64 digitalSTROM terminals per dSM (with 2 dSIDs per terminal)

Limitation of the capacitive load per dSM

1. Up to 3 circuit breakers (LS-B16A) behind a dSM25
2. Up to 20 Dali lamps (LED power supplies) behind a dSM

When device filters are required:

- Wallbox (E-Auto), 3x16A (11kW) or 3x32A (22kW)
- Inverter (PV system)
- Heat pump with frequency converter
- Induction cooker
- Geberit AquaClean (Closomat)
